Dear members of the University Council, dear Hans,

We received and appreciate your letter about the creation of a Sustainability Award to promote sustainability within the EUR. We want to thank you for bringing this up and agree with you that this can be a great way to highlight, reward and share good examples of sustainable behavior, projects, or initiatives.

The details about categories, procedure and awards will need to be worked out, and we suggest that the EUR program manager sustainability Mariecke van der Glas works with you on a proposal that is fitting and feasible for all. The final form may then deviate from your initial proposal in your letter but will serve the purpose of increasing visibility and perceived importance in our community, as you rightly state in your letter.

On behalf of the Executive Board

dr. E.M.A. van Schoten
Member Executive board
